AT A GLANCE

The green.ch group consists of two companies, green.ch AG and Green Datacenter AG. green.ch AG is a successful Internet service provider and webhoster who has been in operation since 1995. Green Datacenter AG is a data center provider and runs the data center business for the green.ch group. The company serves a total of 100,000 customers. green.ch AG and GreenDatacenter AG are part of the Altice Group.

NO COMPROMISES DATA SECURITY

YOUR SWISS DATA CENTER PROVIDER

Green Datacenter AG offers data center services for medium-sized and large companies in Switzerland, Europe and around the world.

On a green field in the Zurich–Basel–Bern business triangle, Green Datacenter AG operates Switzerland's largest commercial data center. The state-of-the-art, highly secure, energy-efficient greenDatacenter Zurich West in Lupfig was built in accordance with the Tier IV standard – a data center that meets the highest requirements. It is located a safe distance from large urban centers and far from airports and transport routes for dangerous goods.

With its four data centers, Green Datacenter AG offers the right housing solution tailored to widely varying housing needs. Server housing solutions range from quarter racks to individually laid out, flexible and expandable rooms. We work together with our customers to determine the right solution for their data volumes. We are currently building a six-level office complex next to GreenDatacenter Zurich West for customers who require maximum availability. When completed in the fall of 2016, InnovationTower will offer many future-ready workplaces as well as a range of ultramodern emergency workplaces.

All greenDatacenters are operated in accordance with ISO 27001, the comprehensive information security standard, and in accordance with the ISO 50001 standard for energy management. Our data centers have been nationally and internally certified by SQS and IQ NET.

OUR PROMISE

Not just our name is green, we also invest in new energy-saving technologies. GreenDatacenter Zurich West is one of the most efficient data centers in Switzerland and was awarded a Watt d'Or by the Swiss Federal Office of Energy (BFE). Furthermore, as a member of the cooperative of gravitation water vortex power plants Switzerland, we promote the production of alternative energy. In our data centers, all customers can choose to receive electricity from Swiss hydroelectric stations. That is real Green IT in action.

Your first choice in Switzerland
